SUMMARY

Cloud Infrastructure Engineer with 4 years of experience in designing, deploying, and managing Kubernetes-based private cloud and telecom infrastructure. Skilled in containerization, automation, and large-scale cluster operations on bare metal environments. Proven ability to reduce downtime, improve system reliability, and handle critical production incidents. Strong expertise in networking, storage (Ceph), and monitoring tools like Prometheus and Grafana.

SKILLS

Containerization & Orchestration: Kubernetes, Docker, Helm

Cloud & Infrastructure: Private Cloud, Bare Metal, Openstack, Virtualization, CNIS, AWS, GCP, Terraform

Monitoring & Logging: Prometheus, Grafana, VictoriaMetrics, Checkmk

Networking: TCP/IP, DNS, DHCP, VLAN, BGP, Load Balancing, SR-IOV, CNI

Storage: Ceph, Local Storage Provisioner (LSP)

Scripting & Automation: Shell Scripting, YAML, Basic Python, Jenkins

Tools: Git, Gerrit, Jira, Confluence

Operating Systems: Linux (CentOS, Ubuntu, SUSE)

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS), Hyderabad - *Cloud Infrastructure Engineer*

Client: Shared Target Cloud | Ericsson AB

May 2022 - PRESENT

Technologies: Kubernetes, Docker, Ceph, Prometheus, Grafana, Jenkins, Linux, Git, Gerrit, Terraform

- Designed and deployed Kubernetes clusters on bare metal infrastructure for telecom environments.
- Managed cluster scaling, node health, and workload performance to ensure high availability and optimal resource utilization.

-
- Played a key role in managing large-scale telecom cloud infrastructure, ensuring high availability, scalability, and performance.
 - Implemented monitoring using Prometheus, Grafana, and Checkmk to improve system reliability.
 - Created and maintained Kubernetes YAML configurations for application deployments.
 - Administered Ceph storage for scalable and fault-tolerant data management.
 - Performed upgrades of CNIS, SDI, Control Fabric, and Data Fabric with minimal downtime.
 - Configured and troubleshooted network devices (Juniper, Pluribus, Extreme switches).
 - Resolved production issues across cloud, networking, and hardware layers (HPE/Dell servers).
 - Managed incidents, change requests, and service requests via Jira, ensuring SLA compliance.
 - Collaborated with cross-functional teams to resolve critical production issues and improve deployment efficiency.
 - Worked on CI/CD processes using Jenkins for deployment automation.

EDUCATION

Bachelor Of Engineering - Mechanical Engineering

Pydah Kaushik College Of Engineering | 2016 - 2019

AWARDS

Received “On-the-Spot Award” twice for delivering deployments ahead of schedule.

Awarded “Star of the Month” for excellent contribution and ownership of CNIS and Data Fabric expansion deployments.

Recognized as “Star of the Quarter” for resolving integration issues and supporting users.

CERTIFICATIONS

Google Cloud Certified Associate Cloud Engineer

Issued Dec-2022 (ID: T77mYz)

DevOps Engineer By Edureka

Issued Dec-2023 (ID: UH8KHNSC8)

CKA: Certified Kubernetes Administrator

Course by Mumshad Mannambeth
