

Krishna Vamsi Veeriseti

DevOps Engineer

Email: veerisetikrishnavamsi@gmail.com | Contact: +91 9160547781
Gachibowli, Hyderabad - 500032

SUMMARY

DevOps Engineer with 3 years of experience in implementing CI/CD pipelines, automating application deployments, and managing cloud infrastructure on AWS. Experienced in Jenkins, GitHub Actions, Argo CD, Docker, Kubernetes, Terraform, and Git, with good expertise in Infrastructure as Code (IaC), production deployments, and DevOps automation. Skilled in application onboarding, production support, incident troubleshooting, Root Cause Analysis (RCA), and monitoring using Prometheus, Grafana, and CloudWatch. Adept at collaborating with development, QA, and operations teams to streamline software delivery, improve deployment efficiency, and ensure reliable application availability.

SKILLS

- **Methodologies:** Agile, Scrum, SDLC
- **Cloud Platform:** AWS (EC2, EKS, VPC, IAM, S3, ECR, ALB, NLB, Route 53, CloudWatch)
- **Version Control:** GIT, GitHub
- **CI/CD:** Jenkins, GitHub Actions & Argo CD
- **Containerization & Orchestration:** Docker, Kubernetes & Helm
- **Operating System:** Linux (Ubuntu, Amazon Linux)
- **IAAC:** Terraform
- **Monitoring:** Prometheus & Grafana, and CloudWatch
- **Scripting:** Bash, Python, YAML
- **Security:** Sonar, Trivy & OWASP

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad – DevOps Engineer

- Designed and maintained CI/CD pipelines using Jenkins, GitHub Actions and Argo CD for automated build, test and deployment across Development, QA and Production environments.
- Managed application onboarding into the DevOps toolchain by configuring repositories, pipelines, credentials and deployment workflows.
- Provisioned and managed AWS infrastructure using Terraform, ensuring consistent and automated deployments.
- Containerized applications using Docker and deployed microservices on Kubernetes (EKS) using Helm charts.
- Collaborated with development, QA and operations teams to automate software delivery and improve release efficiency.
- Developed Bash and Python scripts to automate deployment, monitoring and routine operational tasks.
- Monitored applications and infrastructure using Prometheus, Grafana and CloudWatch, proactively identifying and resolving performance issues.
- Troubleshoot deployment failures, production incidents and infrastructure issues by performing Root Cause Analysis (RCA) and implementing preventive actions.
- Resolved production support tickets within SLA, provided user access support for DevOps tools and followed escalation procedures for critical issues.
- Integrated SonarQube and Trivy security scans into CI/CD pipelines to improve code quality and detect vulnerabilities before deployment.

-
- Supported production environments by resolving deployment, infrastructure and CI/CD tool-related incidents while meeting SLA timelines and coordinating with cross-functional teams.

PROJECT

SUNCOO – *Cloud-Native Microservices-Based E-Commerce Platform*

Worked on a cloud-native microservices application hosted on AWS, supporting the complete software delivery lifecycle from code integration to production deployment. Utilized Jenkins, GitHub Actions and Argo CD to automate CI/CD pipelines, Docker for containerization, Kubernetes (Amazon EKS) for container orchestration, and Terraform for Infrastructure as Code (IaC). Collaborated with development, QA and operations teams to manage application onboarding, production releases and environment configurations. Implemented monitoring using Prometheus, Grafana and CloudWatch to ensure application availability and performance. Provided production support by troubleshooting deployment failures, resolving infrastructure issues and performing Root Cause Analysis (RCA) to maintain reliable software delivery.

EDUCATION

Bachelor Of Engineering - Mechanical Engineering

- Raghu Engineering College | 2019 - 2022

AWARDS

- Recognized as “Star of the Quarter” for reliable production support and effective collaboration in resolving deployment and operational issues.
- Received client appreciation for successfully managing production deployments and resolving critical issues within SLA timelines.

CERTIFICATIONS

- **IBM Applied DevOps Engineering** - Issued Feb-2026
- **Azure Administrator Associate** - Issued July 2023
