SUMMARY

Cloud / DevOps Engineer with 2.7+ years of experience supporting and delivering containerized applications on Kubernetes-based environments, with hands-on involvement in CI/CD pipelines, cloud infrastructure operations, and production support. Experienced in Jenkins-driven automation, Docker, Kubernetes deployments, and AWS EKS, with exposure to Infrastructure as Code using Terraform in test environments. Strong background in monitoring and reliability engineering using Prometheus and Grafana, along with proven ability to support high-availability systems, handle production incidents, and collaborate across teams to meet SLA commitments.

SKILLS

Containerization & Orchestration: Kubernetes, Docker, Helm

Cloud & Infrastructure: AWS (EKS), Virtualization, Terraform

Monitoring & Logging: Prometheus, Grafana, Alerting and dashboard configuration

Networking: DNS, Load Balancing, Kubernetes networking basics

Storage: Kubernetes persistent storage concepts, Amazon S3

Scripting & Automation: Shell Scripting, YAML, Basic Java, Jenkins

Tools: Git, GitHub, Jira

Operating Systems: Linux (Amazon, Ubuntu)

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad - *Cloud Infrastructure Engineer*

Technologies: Kubernetes, Docker, Prometheus, Grafana, Jenkins, Linux, Git, Terraform

- Acted as a core team member in managing a large-scale cloud and Kubernetes environment, supporting cluster scaling, node health, and workload performance to maintain high availability and efficient resource utilization.

-
- Played a significant role in CI/CD and deployment workflows, working with Jenkins pipelines to automate build and deployment processes.
 - Created, updated, and maintained Kubernetes YAML manifests for application deployments, services, scaling, and configuration management in production environment.
 - Contributed to monitoring and system reliability initiatives by working with Prometheus, Grafana, helping improve visibility into application and infrastructure health.
 - Actively participated in production operations, handling incidents, change requests, and service requests via Jira, while collaborating with cross-functional teams to resolve critical issues and meet SLA commitments.
 - Assisted in Infrastructure as Code (IaC) initiatives using Terraform, supporting EKS infrastructure setup and validation in test environments as part of ongoing cloud modernization efforts.
 - Supported release readiness and environment stability by validating deployments across environments, performing post-deployment checks, and contributing to continuous improvement of DevOps processes.

EDUCATION

Bachelor Of Engineering - *Mechanical Engineering*

Raghu Engineering College | 2019 - 2022

AWARDS

Awarded “Star of the Month” for consistent contributions to CI/CD support and Kubernetes operations during active project deliverables.

Recognized as “Star of the Quarter” for reliable production support and effective collaboration in resolving deployment and operational issues.

CERTIFICATIONS

IBM Applied DevOps Engineering

Issued Feb-2026

Azure Administrator Associate

Issued July 2023
