KRISHNA VAMSI VEERISETTI

DevOps Engineer | CI/CD Automation | Python & Bash | Ansible | Linux | SRE
Gachibowli, Hyderabad - 500032 | +91 9160547781 | veerisettikrishnavamsi@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience supporting AWS cloud infrastructure, Linux-based systems, CI/CD pipelines and production reliability. Hands-on experience with Jenkins, Git, Docker, Kubernetes/EKS, Terraform, Prometheus and Grafana. Python and Bash scripting knowledge for operational automation, with Ansible configuration-management fundamentals. Experienced in build and deployment troubleshooting, cloud monitoring, incident investigation and cross-team engineering support.

TECHNICAL SKILLS

Automation & Scripting: Python 3 (scripting fundamentals), Bash/Shell, YAML; Ansible (playbooks, inventories, configuration-management fundamentals)
CI/CD & Build: Jenkins, Git/GitHub, GitHub Actions, Docker image build, ECR publishing, release automation
Infrastructure & Cloud: Terraform modules and remote state; AWS EC2, VPC, IAM, EKS, ECR, S3, ALB, CloudWatch
Linux & Operations: Linux (Ubuntu, Amazon Linux), SSH, process/service troubleshooting, logs, permissions, package-management concepts
Containers & Orchestration: Docker, Kubernetes/EKS, Helm, Deployments, Services, Ingress, probes, HPA, RBAC
Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch, metrics, alerts, incident triage, RCA
Networking: DNS, TCP/IP, HTTP/HTTPS, security groups, VPC public/private subnets, load balancers
Security & Quality: Trivy, Checkov, Gitleaks, SonarQube, IAM least privilege, Kubernetes RBAC
Additional Tools to Develop: Groovy, SBT, Robot Framework, RPM/YUM/DNF, RHEL/Rocky/Oracle Linux

PROFESSIONAL EXPERIENCE

Capgemini Technology Services India Ltd. - DevOps Engineer | Hyderabad

- Provisioned and maintained AWS infrastructure using Terraform modules, including EC2, EKS, VPC, IAM, ECR and application load balancing; supported repeatable environment provisioning.
- Supported Linux-hosted workloads and containerized microservices, investigating process, service, deployment and connectivity issues using logs and command-line diagnostics.
- Built and maintained Jenkins and GitHub Actions CI/CD workflows for source validation, testing, Docker builds, security scanning, ECR publication and application deployments.
- Applied Python/Bash scripting fundamentals to automation-oriented troubleshooting and workflow improvements; developed familiarity with Ansible inventory and playbook structure for configuration management.
- Supported build, release and deployment workflows using Git, Docker, Helm and Argo CD; collaborated with development and QA teams on release validation.
- Worked with AWS VPC networking, IAM permissions, DNS, security groups, load balancers and Kubernetes service routing to troubleshoot application access.
- Monitored platform health using Prometheus, Grafana and CloudWatch; investigated CPU/memory utilization, application errors, pod restarts and alert conditions.
- Troubleshot failed deployments, OOMKilled workloads, image-pull issues, service endpoints and load-balancer health checks; contributed to root cause analysis and recovery.
- Collaborated with engineering and operations teams to improve deployment consistency, support production incidents and document troubleshooting findings.

PROJECT

SUNCOO – Cloud-Native E-Commerce Platform | CI/CD, Automation & Reliability

- Supported AWS-based microservices running on Amazon EKS with private application networking, ALB ingress, ECR, RDS and S3; worked with Terraform-managed infrastructure.
- Supported Git-to-deployment delivery through Jenkins/GitHub Actions, quality and vulnerability checks, Docker builds, ECR, Helm and Argo CD.
- Monitored workloads using Prometheus, Grafana and CloudWatch, including pod health, CPU/memory pressure, deployment status and service availability.
- Investigated production incidents involving Order Service database connection exhaustion (HTTP 503/504) and Product Service OOMKilled restarts (exit 137), coordinating fixes and validation.

CLOUD MIGRATION EXPOSURE

Hands-on exposure to AWS migration activities using AWS Application Migration Service (MGN) and AWS Database Migration Service (DMS), including replication validation, test/cutover activities and database migration from MariaDB to Amazon RDS MySQL.

EDUCATION

Bachelor of Engineering - Mechanical Engineering | Raghu Engineering College | 2019 – 2022

CERTIFICATIONS & RECOGNITION

- IBM Applied DevOps Engineering - Issued Feb 2026
- Microsoft Azure Administrator Associate - Issued July 2023
- Recognized as "Star of the Quarter" for reliable production support and collaboration in resolving deployment and operational issues.
