

Krishna Vamsi Veeriseti

DevOps Engineer

Email: veerisetikrishnavamsi@gmail.com | Contact: +91 9160547781
Gachibowli, Hyderabad - 500032

SUMMARY

DevOps Engineer with 3 years of experience designing, deploying, and supporting cloud-native applications on AWS. Experienced in AWS infrastructure, Terraform, Jenkins CI/CD, Docker, Kubernetes (EKS), and infrastructure automation. Skilled in monitoring using CloudWatch, Prometheus, and Grafana, implementing Infrastructure as Code, troubleshooting production issues, and collaborating with cross-functional teams to deliver secure, scalable, and highly available cloud solutions.

SKILLS

- **Methodologies:** Agile, Scrum, SDLC
- **Cloud Platform:** AWS (EC2, EKS, VPC, IAM, S3, ECR, RDS, Route 53, CloudWatch)
- **Version Control:** GIT, GitHub
- **CI/CD:** Jenkins, GitHub Actions & Argo CD
- **Containerization & Orchestration:** Docker, Kubernetes & Helm
- **Operating System:** Linux (Ubuntu, Amazon Linux)
- **IAAC:** Terraform
- **Monitoring:** Prometheus & Grafana, and CloudWatch
- **Scripting:** Bash, Python, YAML
- **Security:** Sonar, Trivy & OWASP

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad – DevOps Engineer

- Designed, deployed, and managed scalable, secure, and highly available AWS cloud infrastructure using EC2, VPC, ELB, ALB, RDS, S3, IAM, Route 53, EKS, and ECS to support production workloads.
- Developed and maintained Infrastructure as Code (IaC) solutions using Terraform to automate AWS resource provisioning, configuration management, and infrastructure lifecycle management.
- Built and optimized CI/CD pipelines using Jenkins to automate application build, testing, deployment, and release processes.
- Automated server provisioning, configuration tasks, and deployment workflows using Python scripting, improving operational efficiency and reducing manual intervention.
- Managed containerized applications using Docker, Amazon EKS (Kubernetes), and Amazon ECS, including container deployment, scaling, networking, and cluster troubleshooting.
- Implemented Kubernetes orchestration using Deployments, Services, ConfigMaps, Secrets, Ingress, Persistent Volumes, RBAC, and Horizontal Pod Autoscaling (HPA) for reliable application delivery.
- Implemented monitoring, logging, and alerting solutions using Amazon CloudWatch, Prometheus, Grafana to track infrastructure health, application performance, and security events.
- Applied AWS security best practices by managing IAM policies, roles, Security Groups, Network ACLs (NACLs), encryption, access controls, and vulnerability management across cloud environments.
- Designed and troubleshoot AWS networking components including VPC, DNS, TCP/IP, VPN connectivity, load balancers, subnets, and routing configurations to ensure secure and reliable communication.
- Collaborated with development, security, and operations teams to troubleshoot infrastructure issues, perform root cause analysis, maintain technical documentation, and implement DevOps and Agile best practices for continuous improvement.

PROJECT

SUNCOO – *Cloud-Native Microservices-Based E-Commerce Platform*

Developed a scalable cloud-native e-commerce application consisting of multiple microservices deployed on AWS. The application was containerized using Docker and hosted on Amazon EKS, with automated infrastructure provisioning using Terraform and continuous deployments through Jenkins CI/CD pipelines. Implemented AWS services such as RDS, S3, IAM, and Load Balancers to support application scalability, security, and reliability. Integrated monitoring using CloudWatch, Prometheus, and Grafana to track application performance and infrastructure health.

EDUCATION

Bachelor Of Engineering - Mechanical Engineering

- Raghu Engineering College | 2019 - 2022

AWARDS

- Recognized as “Star of the Quarter” for reliable production support and effective collaboration in resolving deployment and operational issues.
- Received client appreciation for successfully managing production deployments and resolving critical issues within SLA timelines.

CERTIFICATIONS

- **IBM Applied DevOps Engineering** - Issued Feb-2026
- **Azure Administrator Associate** - Issued July 2023
