SUMMARY

Cloud / DevOps Engineer with 2.8+ years of experience in Kubernetes-based environments, delivering and supporting containerized applications with a strong focus on CI/CD pipelines and cloud infrastructure on AWS EKS. Skilled in Jenkins, GitHub Actions, and Argo CD for automation and GitOps-driven deployments, along with Docker and Terraform for infrastructure provisioning. Experienced in managing production workloads, ensuring high availability, performance optimization, and incident resolution in SLA-driven environments. Proficient in monitoring and observability using Prometheus and Grafana, with strong collaboration skills to enhance system reliability and delivery efficiency.

SKILLS

Containerization & Orchestration: Kubernetes, Docker, Helm

Cloud & Infrastructure: AWS (EKS), Virtualization, Terraform

CI/CD & Automation: Jenkins, GitHub Actions, Argo CD (GitOps Deployments)

Monitoring & Logging: Prometheus, Grafana, Alerting and dashboard configuration

Networking: DNS, Load Balancing, Kubernetes networking basics

Storage: Kubernetes persistent storage concepts, Amazon S3

Scripting: Shell Scripting, YAML, python

Tools: Git, GitHub, Jira

Operating Systems: Linux (Amazon Linux, Ubuntu)

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad - *Cloud Infrastructure Engineer*

Technologies: Kubernetes, Docker, Prometheus, Grafana, Jenkins, Linux, Git, Terraform

- Acted as a core team member in managing a large-scale cloud and Kubernetes environment, supporting cluster scaling, node health, and workload performance to maintain high availability and efficient resource utilization.

-
- Played a significant role in CI/CD and deployment workflows, working with Jenkins and GitHub Actions pipelines to automate build and deployment processes.
 - Created, updated, and maintained Kubernetes YAML manifests for application deployments, services, scaling, and configuration management in production environment.
 - Contributed to monitoring and system reliability initiatives by working with Prometheus, Grafana, helping improve visibility into application and infrastructure health.
 - Actively participated in production operations, handling incidents, change requests, and service requests via Jira, while collaborating with cross-functional teams to resolve critical issues and meet SLA commitments.
 - Assisted in Infrastructure as Code (IaC) initiatives using Terraform, supporting EKS infrastructure setup and validation in test environments as part of ongoing cloud modernization efforts.
 - Supported release readiness and environment stability by validating deployments across environments, performing post-deployment checks, and contributing to continuous improvement of DevOps processes.

EDUCATION

Bachelor Of Engineering - *Mechanical Engineering*

Raghu Engineering College | 2019 - 2022

AWARDS

Recognized as “Star of the Quarter” for reliable production support and effective collaboration in resolving deployment and operational issues.

Received client appreciation for successfully managing production deployments and resolving critical issues within SLA timelines.

CERTIFICATIONS

IBM Applied DevOps Engineering

Issued Feb-2026

Azure Administrator Associate

Issued July 2023
