SUMMARY

AWS Cloud & DevOps Engineer with 3+ years of experience in designing, implementing, and managing scalable cloud infrastructure on Amazon Web Services (AWS). Hands-on expertise in AWS EC2, VPC, IAM, S3, RDS, EKS, Route 53, CloudWatch, Load Balancers, Terraform, Docker, Kubernetes, and Jenkins. Experienced in cloud migration, Infrastructure as Code (IaC), CI/CD automation, and production support. Good understanding of AWS Well-Architected Framework, security best practices, cost optimization, high availability, and cloud transformation initiatives. Proven ability to collaborate with cross-functional teams to deliver secure, reliable, and business-aligned cloud solutions.

SKILLS

- **Methodologies:** Agile, Scrum, SDLC
- **Cloud Platform:** AWS (EC2, EKS, VPC, IAM, S3, ECR, RDS, Route 53, CloudWatch)
- **Version Control:** GIT, GitHub
- **CI/CD:** Jenkins, GitHub Actions & Argo CD
- **Containerization & Orchestration:** Docker, Kubernetes & Helm
- **Operating System:** Linux (Ubuntu, Amazon Linux)
- **IAAC:** Terraform
- **Monitoring:** Prometheus & Grafana, and CloudWatch
- **Scripting:** Bash, Python, YAML
- **Security:** Sonar, Trivy & OWASP

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad – DevOps Engineer

- Implemented and managed scalable AWS cloud infrastructure using EC2, VPC, IAM, S3, RDS, Route 53, Auto Scaling, and Load Balancers, ensuring high availability and reliability.
- Provisioned and automated AWS infrastructure using Terraform, implementing Infrastructure as Code (IaC) for consistent environment deployments.
- Supported cloud migration and modernization initiatives by implementing Rehost, Replatform, and Refactor strategies for enterprise applications.
- Deployed and managed containerized applications on Amazon EKS using Docker, Kubernetes, and Helm, improving application scalability and operational efficiency.
- Built and maintained CI/CD pipelines using Jenkins, GitHub, and Argo CD, automating build, test, and deployment processes.
- Implemented AWS security best practices including IAM, Security Groups, encryption, and monitoring with CloudWatch, Prometheus, and Grafana.
- Collaborated with cross-functional teams to optimize cloud performance, troubleshoot production issues, and improve infrastructure reliability and cost efficiency.
- Participated in cloud architecture discussions, capacity planning, disaster recovery planning, and implementation of secure, scalable AWS solutions.
- Investigated production issues, performed root cause analysis (RCA), and resolved deployment and infrastructure incidents while meeting SLA commitments.

PROJECT

SUNCOO – *Cloud-Native Microservices-Based E-Commerce Platform*

Designed and supported a cloud-native microservices-based e-commerce platform hosted on Amazon Web Services (AWS). The application was built using Node.js with Amazon RDS (PostgreSQL) as the backend database. Infrastructure was provisioned using Terraform and AWS CloudFormation, while applications were containerized using Docker and deployed on Amazon EKS (Kubernetes). Developed automated CI/CD pipelines using Jenkins and Argo CD for continuous delivery. Implemented monitoring through Amazon CloudWatch, Prometheus, and Grafana, and followed AWS security best practices using IAM and network security controls. Supported cloud modernization, high availability, performance optimization, and cost-efficient infrastructure management.

EDUCATION

Bachelor Of Engineering - Mechanical Engineering

- Raghu Engineering College | 2019 - 2022

AWARDS

- Recognized as “Star of the Quarter” for reliable production support and effective collaboration in resolving deployment and operational issues.
- Received client appreciation for successfully managing production deployments and resolving critical issues within SLA timelines.

CERTIFICATIONS

- IBM Applied DevOps Engineering - Issued Feb-2026
- Azure Administrator Associate - Issued July 2023
