KRISHNA VAMSI VEERISETTI

AWS DEVOPS ENGINEER | CLOUD INFRASTRUCTURE | CI/CD AUTOMATION

Hyderabad, India | Open to Mumbai / Relocation | +91 9160547781 | veerisettikrishnavamsi@gmail.com

PROFESSIONAL SUMMARY

AWS DevOps Engineer with 3+ years of experience designing, provisioning and supporting secure, highly available AWS infrastructure and cloud-native application deployments. Hands-on experience with Terraform, Amazon EKS, Docker, Jenkins, GitHub Actions, Helm, Argo CD and AWS networking. Experienced in CI/CD automation, IAM and network security, CloudWatch/Prometheus/Grafana monitoring, Linux troubleshooting, production incident resolution and cross-functional release support. Familiar with AWS migration workflows and automation using Python and Bash.

TECHNICAL SKILLS

AWS Cloud: EC2, VPC, IAM, S3, RDS, EKS, ECR, ALB/NLB, Route 53, CloudWatch, Lambda; subnets, NAT, route tables, security groups, NACLs

Infrastructure as Code: Terraform (modules, variables, data sources, remote S3 state, state locking, plan/apply, workspaces)

CI/CD & Automation: Jenkins, GitHub Actions, Git/GitHub, Argo CD, Bash/Shell, Python, Ansible (exposure), YAML

Containers & Orchestration: Docker, Kubernetes/EKS, Helm, Deployments, Services, Ingress/Gateway API, HPA, probes, RBAC, NetworkPolicies, IRSA

Monitoring & Security: CloudWatch, Prometheus, Grafana, SonarQube, Trivy, Checkov, Gitleaks; IAM least privilege, container/IaC scanning

Networking & Operations: Linux, DNS, TCP/IP, HTTPS/TLS, load balancers, application health checks, log analysis, RCA, runbooks, incident management

PROFESSIONAL EXPERIENCE

Capgemini Technology Services India Ltd. | DevOps Engineer | Hyderabad

- Designed and provisioned AWS infrastructure with reusable Terraform modules, including VPC public/private subnets, routing, EC2, EKS, ECR, IAM, load balancers and supporting cloud services.
- Built and maintained Jenkins and GitHub Actions CI/CD pipelines for source validation, automated tests, SonarQube checks, Docker builds, Trivy image scans, ECR publication and Kubernetes deployment.
- Deployed microservices on Amazon EKS using Docker, Helm and Argo CD; managed Kubernetes manifests, health probes, RBAC, autoscaling and ingress routing.
- Implemented secure cloud access and networking with IAM roles/policies, security groups, private subnets, Kubernetes service accounts/IRSA and NetworkPolicies.
- Monitored production application health and infrastructure utilization through AWS CloudWatch, Prometheus and Grafana; investigated alerts, container restarts and deployment failures.
- Automated repeatable infrastructure and operational tasks with Terraform, Bash and Python scripting; maintained configuration and deployment documentation.
- Worked with development, QA and infrastructure teams on release planning, environment validation, deployment troubleshooting and production incident remediation.
- Participated in troubleshooting of service connectivity, ECR image pulls, ALB health checks, pod resource constraints and database connectivity; supported RCA and follow-up corrective actions.

PROJECT EXPERIENCE — SUNCOO E-COMMERCE MICROSERVICES PLATFORM

Technology: AWS VPC, EKS, ECR, EC2, ALB, Route 53, RDS PostgreSQL, S3, IAM, Terraform, Jenkins, GitHub Actions, Docker, Helm, Argo CD, CloudWatch, Prometheus, Grafana.

- Supported a multi-service e-commerce platform (user/authentication, product, inventory, cart, order, payment and supporting services) on Amazon EKS, with public ALB ingress, private application workloads and RDS database tier.
- Implemented AWS infrastructure and deployment workflows using Terraform modules and CI/CD automation; maintained GitOps releases through Helm and Argo CD.
- Integrated security checks into delivery: Gitleaks secret scanning, Checkov IaC scanning, SonarQube analysis and Trivy container scanning before deployment.
- Investigated Order Service HTTP 503/504 errors caused by database connection pool exhaustion; correlated application logs and database connectivity, coordinated tuning and verified service recovery.
- Troubleshot Product Service OOMKilled pod restarts (Exit Code 137) using kubectl events/logs and memory metrics; worked with developers on resource and application improvements.
- Supported application availability, monitoring and operational reliability using CloudWatch, Prometheus, Grafana, readiness/liveness probes and HPA.

ADDITIONAL CLOUD & AUTOMATION EXPOSURE

AWS migration practice: AWS Application Migration Service (MGN) and Database Migration Service (DMS) for server and database migration workflows. Additional exposure to AWS Lambda, Kubernetes Gateway API and Ansible; Python/Bash scripting for operational automation.

EDUCATION, CERTIFICATIONS & RECOGNITION

B.E., Mechanical Engineering | Raghu Engineering College | 2019–2022

IBM Applied DevOps Engineering (Feb 2026) | Microsoft Azure Administrator Associate (Jul 2023)

Star of the Quarter recognition; client appreciation for deployment and production support.
