

Krishna Vamsi Veeriseti

DevOps Engineer

Email: veerisetikrishnavamsi@gmail.com | Contact: +91 9160547781
Gachibowli, Hyderabad - 500032

SUMMARY

DevOps Engineer with 3 years of experience in designing, automating, and supporting cloud-native infrastructure on AWS. Experienced in AWS Administration, Infrastructure as Code (Terraform), CI/CD pipeline implementation using Jenkins and GitHub Actions, containerization with Docker, and Kubernetes orchestration on Amazon EKS. Skilled in infrastructure automation, production deployments, monitoring with Prometheus and Grafana, incident troubleshooting, and implementing secure, scalable, and highly available DevOps solutions. Strong experience collaborating with development and operations teams to improve deployment reliability and operational efficiency.

SKILLS

- **Methodologies:** Agile, Scrum, SDLC
- **Cloud Platform:** AWS (EC2, EKS, VPC, IAM, S3, ECR, ALB, NLB, Route 53, CloudWatch)
- **Version Control:** GIT, GitHub
- **CI/CD:** Jenkins, GitHub Actions & Argo CD
- **Containerization & Orchestration:** Docker, Kubernetes & Helm
- **Operating System:** Linux (Ubuntu, Amazon Linux)
- **IAAC:** Terraform
- **Monitoring:** Prometheus & Grafana, and CloudWatch
- **Scripting:** Bash, Python, YAML
- **Security:** Sonar, Trivy & OWASP

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad – DevOps Engineer

- Designed, implemented, and maintained scalable cloud infrastructure on AWS using Terraform (Infrastructure as Code), ensuring consistent and automated environment provisioning.
- Administered AWS services including EC2, IAM, VPC, EKS, ECR, ALB, Route 53, CloudWatch, and S3 to support highly available production applications.
- Built and maintained CI/CD pipelines using Jenkins, GitHub Actions, and Argo CD, automating build, test, and deployment processes while improving release efficiency.
- Containerized microservices using Docker and managed deployments on Amazon EKS (Kubernetes), enabling scalable and fault-tolerant application delivery.
- Managed Kubernetes resources including Deployments, Services, Ingress, ConfigMaps, Secrets, Persistent Volumes, RBAC, HPA, Taints & Tolerations, and Node Affinity.
- Implemented blue-green and canary deployment strategies to achieve zero-downtime application releases and reduce deployment risk.
- Integrated security and quality checks into CI/CD pipelines using SonarQube and Trivy, improving code quality and identifying vulnerabilities before production deployment.
- Monitored infrastructure and application health using Prometheus, Grafana, and AWS CloudWatch, creating dashboards and alerts that reduced incident response time.
- Investigated production issues, performed root cause analysis (RCA), and resolved deployment and infrastructure incidents while meeting SLA commitments.

-
- Collaborated with development, QA, and operations teams to automate deployment workflows, optimize infrastructure performance, and improve application reliability.
 - Documented deployment procedures, infrastructure configurations, and operational best practices to support knowledge sharing within the team.

PROJECT

SUNCOO – *Cloud-Native Microservices-Based E-Commerce Platform*

Worked on the SUNCOO cloud-native microservices-based e-commerce platform hosted on AWS. Managed and administered AWS services including Amazon EKS, EC2, IAM, ECR, ALB, Route 53, CloudWatch, and RDS. Automated infrastructure provisioning using Terraform (Infrastructure as Code) and implemented CI/CD pipelines with Jenkins and Argo CD for efficient application deployments. Containerized applications using Docker and orchestrated deployments on Kubernetes, while monitoring application performance with Prometheus and Grafana to ensure secure, scalable, and highly available production environments.

EDUCATION

Bachelor Of Engineering - Mechanical Engineering

- Raghu Engineering College | 2019 - 2022

AWARDS

- Recognized as “Star of the Quarter” for reliable production support and effective collaboration in resolving deployment and operational issues.
- Received client appreciation for successfully managing production deployments and resolving critical issues within SLA timelines.

CERTIFICATIONS

- **IBM Applied DevOps Engineering** - Issued Feb-2026
- **Azure Administrator Associate** - Issued July 2023
