Gachibowli, Hyderabad - 500032

SUMMARY

DevOps / Cloud Infrastructure Engineer with 3 years of experience in managing and deploying Kubernetes-based production environments and cloud-native application on AWS. Proficient in Kubernetes, Docker, Jenkins, GitHub Actions, Terraform, and Argo CD for CI/CD automation and GitOps-driven deployments. Experienced in AWS EKS administration, Infrastructure as Code (IaC), production deployments, incident management, and monitoring using Prometheus and Grafana. Skilled in maintaining highly available application environments, troubleshooting production issues, and ensuring reliable software delivery.

SKILLS

- **Methodologies:** SDLC, Agile/Scrum
- **Cloud Platform:** AWS (EC2, S3, VPC, IAM, SNS, ALB, NLB, ECR, ELB & Route 53)
- **SCM:** GIT, GitHub
- **CI/CD:** Jenkins, GitHub Actions & Argo CD
- **Containerization & Orchestration:** Docker, Kubernetes & Helm
- **Kubernetes Concepts:** Deployments, Services, ConfigMaps, Secrets, Ingress, Persistent Volumes, Horizontal Pod Autoscaler (HPA), RBAC, Taints & Tolerations, Node Affinity
- **IAAC:** Terraform
- **Monitoring:** Prometheus & Grafana, and Cloud Watch
- **Scripting:** Bash, python, YAML
- **Security:** Sonar, Trivy & OWASP

PROFESSIONAL EXPERIENCE

Capgemini Technologies Services India LTD, Hyderabad – DevOps Engineer

- Deployed and managed Kubernetes workloads using core resources (Deployments, Services, Ingress, PVs, HPA), ensuring scalable, highly available, and fault-tolerant applications.
- Orchestrated **blue-green and canary deployments** on Kubernetes, enabling zero downtime during application upgrades and feature rollouts.
- Monitored and optimized Kubernetes cluster resource utilization using Prometheus and Grafana, improving application performance and reducing infrastructure costs.
- Built and managed scalable infrastructure using **Terraform**, enabling consistent and automated provisioning of resources across AWS environments.
- Integrated security checks and vulnerability scanning in CI/CD pipelines using Jenkins plugins for image scanning and security auditing tools.
- Collaborated with development teams to implement **Git branching strategies** for streamlined code integration, ensuring smooth merges, reviews, and conflict resolution.
- Implemented a GitOps-based deployment strategy with Argo CD integrated into Jenkins-driven CI pipelines, enabling automated build, test, and deployment workflows across Kubernetes environments, reducing release time by 30% while ensuring consistent and reliable application delivery.
- Containerized applications using **Docker**, streamlining development workflows and enabling faster deployments in microservices architecture.

-
- Utilized Docker images and containers to standardize environment setups across development, staging, and production environments, improving consistency and reducing "works on my machine" issues.
 - Configured and monitored system performance metrics using **Prometheus**, creating custom alerts and **Grafana** dashboards to track application performance, reducing incident response time by 40%.

PROJECT

This project is a cloud-native application built on microservices architecture, designed for scalable and distributed system operations. It is developed using Node.js and utilizes PostgreSQL (AWS RDS) for reliable and managed data storage. The application uses gRPC and REST APIs for efficient inter-service communication and integrates CI/CD pipelines with Jenkins and Argo CD for automated deployments. It is deployed on AWS using Kubernetes for orchestration, Docker for containerization, and Terraform for infrastructure provisioning, ensuring high availability, scalability, and reliability.

EDUCATION

Bachelor Of Engineering - Mechanical Engineering

- Raghu Engineering College | 2019 - 2022

AWARDS

- Recognized as "Star of the Quarter" for reliable production support and effective collaboration in resolving deployment and operational issues.
- Received client appreciation for successfully managing production deployments and resolving critical issues within SLA timelines.

CERTIFICATIONS

- **IBM Applied DevOps Engineering** - Issued Feb-2026
- **Azure Administrator Associate** - Issued July 2023
